

PYTHON IN SHELL

Shell mein koi code likho toh vo save nhi hota hai

```
anushka@apples-MacBook-Pro ~ % cd Python
anushka@apples-MacBook-Pro Python % python3
Python 3.9.6 (default, Apr 30 2025, 02:07:18)
[Clang 17.0.0 (clang-1700.0.13.5)] on darwin
Type "help", "copyright", "credits" or "license" for more information.
[>>> print("HELLO")
HELLO
[>>> 2*2
4
[>>> "hello"*4
'hellohellohellohello'
[>>> score = 100
[>>> score
100
[>>> tea
Traceback (most recent call last):

>>> import say_hello
Traceback (most recent call last):
  File "<stdin>", line 1, in <module>
ModuleNotFoundError: No module named 'say_hello'
>>> import hello
Hello
Bye
>>> import one
YEEEEEE
>>> hello.say_hello('B00000')
B00000
>>> hello.one
Traceback (most recent call last):
  File "<stdin>", line 1, in <module>
AttributeError: module 'hello' has no attribute 'one'
>>> █

```

Import krne ke baad hamne one naam ka variable/attribute add kiya tha isliye error aarha hai

To solve -> yaa toh vapas sab hata ke import kro

Ya fir

```

>>> from importlib import reload
>>> reload(hello)
Hello
Bye
<module 'hello' from '/Users/anushka/Python/01_basics/hello.py'>
>>> hello.one
'ONE'
>>> █

```
